Case Study Description

1. Please submit a short abstract summarizing your case study. (up to 1500 characters)
2. What types of challenges (business operations, design, technical) did you face in trying to implement this solution, and specifically what actions did you take to overcome these challenges? (up to 1200 characters)
3. How are you collecting information about the impact the solution has had relative to the project's goals? (up to 1000 characters)
4. What lessons learned will others be able to apply from participating in your case study? (up to 1000 characters)
5. How will attendees obtain hands on experience with the solution you developed? Attendees are encouraged to bring a laptop to the forum; but not every participant does. Please keep this in mind when considering how some attendees will engage with the game. (up to 1000 characters)

6. Please provide a means for evaluators to experience the game, simulation or virtual world that is the subject of this case study proposal. Can you provide screen captures, a demo disc, website address, or access a demo portal? (up to 1000 characters)

7. (Optional) A short biographical sketch of the presenter will be required for all accepted case studies. You are welcome to include that information now. Excluding this information will not adversely impact your submission. You are welcome to include links to an online profile or other information. (up to 1000 characters)
