

Connecting to HU Student network via Mac

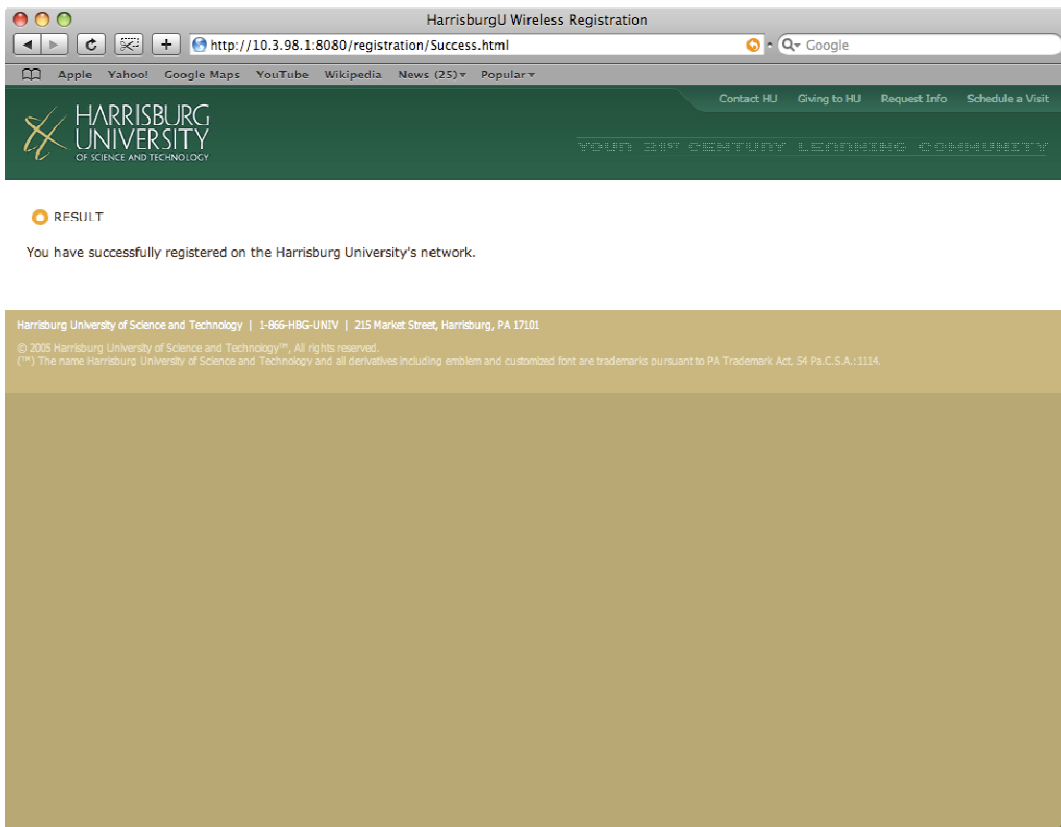

- Connect to the “HU-Student” wireless network
 - Then bring up your internet browser and you should be automatically directed to a login page like below.

- Next click on “START >>” that is next to Network Users
 - A screen to log in will appear, use your network/moodle login and password and select wireless laptop for device type then click on “Download.”

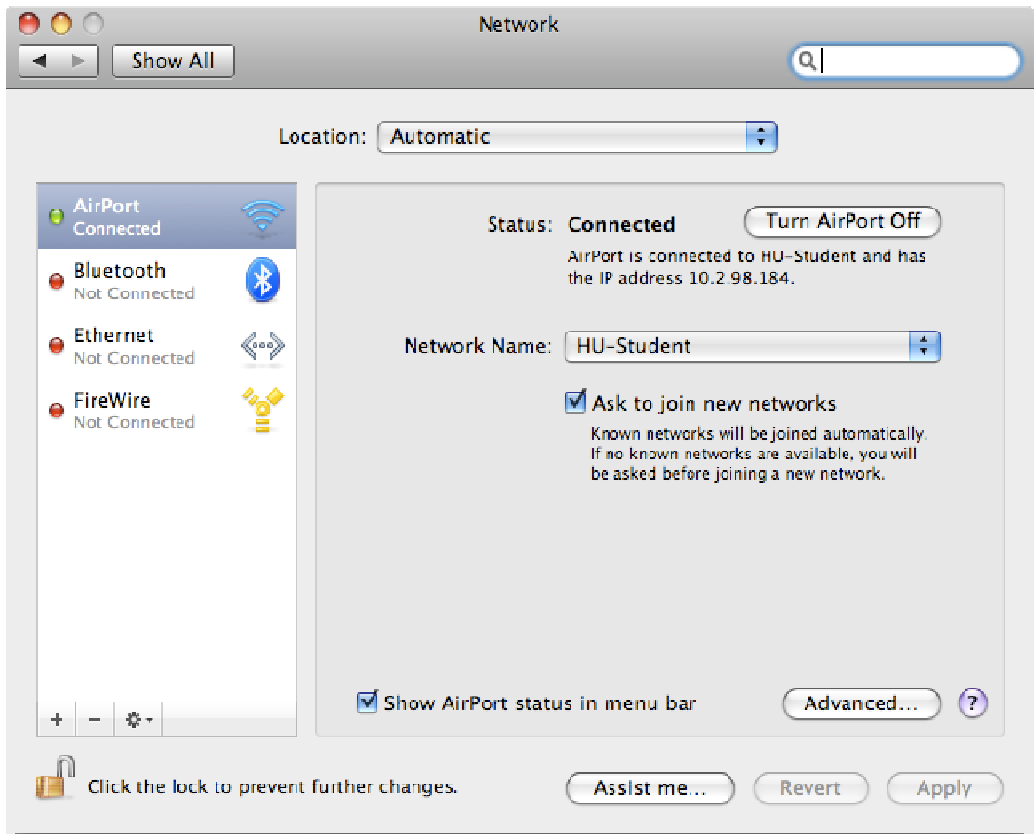

- Once the system check is successful a Safari window should pop up saying you have successfully registered to Harrisburg University's network.

- Now you need to renew your DHCP for your AirPort
 - Go to System Preferences and click on Network

- Make sure AirPort is highlighted and click on the “Advanced” button in the lower right hand corner of the window.

- Click on the TCP/IP tab and then click on the Renew DHCP Lease, then close System Preferences and open up a Safari page. You should be connected to the Internet.
